

# SAFETY DATA SHEET

## 1. Identification

| Product number                    | 1000035542  |
|-----------------------------------|---|
| Product identifier                | FCA573 CAMIE 573 High Performance Adhesive  |
| Revision date                     | 04-02-2019  |
| Company information               | Camie-Campbell, Inc.<br>1000 INTEGRAM DRIVE<br>PACIFIC, MO 63069 United States<br>www.camie.com |
| Company phone                     | General Assistance 1-800-325-9572   |
| Emergency telephone US            | 1-866-836-8855  |
| Emergency telephone outside<br>US | 1-952-852-4646  |
| Version #                         | 04  |
| Supersedes date                   | 03-25-2019  |
| Recommended use                   | Adhesive  |
| Recommended restrictions          | None known.   |
| 2 Hazard(s) identification        |   |

## 2. Hazard(s) identification

Label elements

| Physical hazards     | Flammable aerosols                              | Category 1                  |
|----------------------|---|-----------------------------|
| Health hazards       | Serious eye damage/eye irritation               | Category 2A                 |
|                      | Specific target organ toxicity, single exposure | Category 3 narcotic effects |
|                      | Aspiration hazard                               | Category 1                  |
| OSHA defined hazards | Not classified.                                 |                             |

| Signal word                                  | Danger   |  |  |
|--|--|--|--|
| Hazard statement                             | Extremely flammable aerosol. May be fatal if s irritation. May cause drowsiness or dizziness.  | Extremely flammable aerosol. May be fatal if swallowed and enters airways. Causes serious eye irritation. May cause drowsiness or dizziness.                   |  |
| Precautionary statement                      |  |  |  |
| Prevention                                   | flame or other ignition source. Pressurized co   | surfaces No smoking. Do not spray on an open<br>ntainer: Do not pierce or burn, even after use. Avoid<br>r handling. Use only outdoors or in a well-ventilated |  |
| Response                                     | If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting. If inhaled:<br>Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with<br>water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br>Call a poison center/doctor if you feel unwell. If eye irritation persists: Get medical<br>advice/attention. |  |  |
| Storage                                      | Store in a well-ventilated place. Keep container tightly closed. Store locked up. Protect from<br>sunlight. Do not expose to temperatures exceeding 50°C/122°F.  |  |  |
| Disposal                                     | Dispose of contents/container in accordance  | with local/regional/national/international regulations.  |  |
| Environmental hazards                        | Hazardous to the aquatic environment, acute hazard   | Category 2   |  |
|  | Hazardous to the aquatic environment, long-term hazard   | Category 2   |  |
| Hazard(s) not otherwise<br>classified (HNOC) | None known.  |  |  |

## 3. Composition/information on ingredients

#### Mixtures

| Chemical name                               | Common name and synonyms | CAS number | %        |
|---|--------------------------|------------|----------|
| Methyl Acetate                              |                          | 79-20-9    | 20 - 40  |
| Acetone                                     |                          | 67-64-1    | 10 - 20  |
| Propane                                     |                          | 74-98-6    | 10 - 20  |
| 1,1-difluoroethane                          |                          | 75-37-6    | 2.5 - 10 |
| Dimethyl Ether                              |                          | 115-10-6   | 2.5 - 10 |
| Naphtha, (Petroleum), Hydrotreated<br>Light |                          | 64742-49-0 | 2.5 - 10 |
| n-Heptane                                   |                          | 142-82-5   | 2.5 - 10 |
| Other components below reportable levels    |                          |            | 20 - 40  |

\*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

#### 4. First-aid measures

| Inhalation   | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell.  |
|--|--|
| Skin contact   | Wash off with soap and water. Get medical attention if irritation develops and persists.   |
| Eye contact  | Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.   |
| Ingestion  | Call a physician or poison control center immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.  |
| Most important<br>symptoms/effects, acute and<br>delayed                     | Aspiration may cause pulmonary edema and pneumonitis. May cause drowsiness and dizziness.<br>Headache. Nausea, vomiting. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.   |
| Indication of immediate<br>medical attention and special<br>treatment needed | Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.   |
| General information  | Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.   |
| 5. Fire-fighting measures  |  |
| Suitable extinguishing media   | Alcohol resistant foam. Powder. Carbon dioxide (CO2).  |
| Unsuitable extinguishing media   | Do not use water jet as an extinguisher, as this will spread the fire.   |
| Specific hazards arising from the chemical                                   | Contents under pressure. Pressurized container may explode when exposed to heat or flame.<br>During fire, gases hazardous to health may be formed.   |
| Special protective equipment and precautions for firefighters                | Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.   |
| Fire fighting<br>equipment/instructions                                      | Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out. |
| Specific methods   | Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes.   |
| General fire hazards   | Extremely flammable aerosol.   |

## 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

| Methods and materials for containment and cleaning up | Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Prevent entry into waterways, sewer, basements or confined areas. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.  |
|---|--|
| Environmental precautions                             | Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS. Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.   |
| 7. Handling and storage                               |  |
| Precautions for safe handling                         | Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Avoid breathing mist or vapor. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Avoid release to the environment. Observe good industrial hygiene practices. |
| Conditions for safe storage,                          | Level 2 Aerosol.   |
| including any incompatibilities                       | Store locked up. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Store away from incompatible materials (see Section 10 of the SDS).   |

## 8. Exposure controls/personal protection

## Occupational exposure limits

#### US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

| Components                       | Туре          | Value      |  |
|----------------------------------|---------------|------------|--|
| Acetone (CAS 67-64-1)            | PEL           | 2400 mg/m3 |  |
|                                  |               | 1000 ppm   |  |
| Methyl Acetate (CAS<br>79-20-9)  | PEL           | 610 mg/m3  |  |
|                                  |               | 200 ppm    |  |
| n-Heptane (CAS 142-82-5)         | PEL           | 2000 mg/m3 |  |
|                                  |               | 500 ppm    |  |
| Propane (CAS 74-98-6)            | PEL           | 1800 mg/m3 |  |
|                                  |               | 1000 ppm   |  |
| US. ACGIH Threshold Limit Values | S             |            |  |
| Components                       | Туре          | Value      |  |
| Acetone (CAS 67-64-1)            | STEL          | 500 ppm    |  |
|                                  | TWA           | 250 ppm    |  |

| Heat of combustion (NFPA 30B)              | 21.76 kJ/g estimated           |
| Oxidizing properties                       | Not oxidizing.                 |
| 10. Stability and reactivity               |                                |

| Reactivity                            | The product is stable and non-reactive under normal conditions of use, storage and transport. |
|---------------------------------------|---|
| Chemical stability                    | Material is stable under normal conditions.   |
| Possibility of hazardous<br>reactions | Hazardous polymerization does not occur.  |
| Conditions to avoid                   | Avoid temperatures exceeding the flash point. Contact with incompatible materials.            |
| Incompatible materials                | Strong oxidizing agents. Nitrates.  |
| Hazardous decomposition<br>products   | No hazardous decomposition products are known.  |

## 11. Toxicological information

## Information on likely routes of exposure

| Inhalation   | May cause drowsiness and dizziness. Headache. Nausea, vomiting. Prolonged inhalation may be harmful.  |
|--|---|
| Skin contact   | No adverse effects due to skin contact are expected.  |
| Eye contact  | Causes serious eye irritation.  |
| Ingestion  | Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia.  |
| Symptoms related to the<br>physical, chemical and<br>toxicological characteristics | Aspiration may cause pulmonary edema and pneumonitis. May cause drowsiness and dizziness.<br>Headache. Nausea, vomiting. Severe eye irritation. Symptoms may include stinging, tearing,<br>redness, swelling, and blurred vision. |

## Information on toxicological effects

May be fatal if swallowed and enters airways. Narcotic effects.

| Acute toxicity        | May be fatal if swallowed and enters airways. Narcotic effects. |                        |  |

|                       |           |   |                                |

\* Estimates for product may be based on additional component data not shown.

Persistence and degradability No data is available on the degradability of this product.

#### **Bioaccumulative potential**

| Partition coefficient n-octane | ol / water (log Kow) |       |
|--------------------------------|----------------------|-------|
| 1,1-difluoroethane             |                      | 0.75  |
| Acetone                        |                      | -0.24 |
| Dimethyl Ether                 |                      | 0.1   |
| Methyl Acetate                 |                      | 0.18  |
| n-Heptane                      |                      | 4.66  |
| Propane                        |                      | 2.36  |
| Mobility in soil               | No data available.   |       |

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

## 13. Disposal considerations

| Disposal instructions                 | Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations. |
|---------------------------------------|---|
| Local disposal regulations            | Dispose in accordance with all applicable regulations.  |
| Hazardous waste code                  | The waste code should be assigned in discussion between the user, the producer and the waste disposal company.  |
| Waste from residues / unused products | Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).  |
| Contaminated packaging                | Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.  |

## 14. Transport information

| DOT                         |   |
|-----------------------------|---|
| UN number                   | UN1950  |
| UN proper shipping name     | Aerosols, flammable, (each not exceeding 1 L capacity)                    |
| Transport hazard class(es)  |   |
| Class                       | 2.1   |
| Subsidiary risk             | -   |
| Label(s)                    | 2.1   |
| Packing group               | Not applicable.   |
| Special precautions for use | r Read safety instructions, SDS and emergency procedures before handling. |
| Special provisions          | N82   |
| Packaging exceptions        | 306   |
| Packaging non bulk          | None  |
| Packaging bulk              | None  |

This product meets the exception requirements of section 173.306 as a limited quantity and may be shipped as a limited quantity. Until 12/31/2020, the "Consumer Commodity - ORM-D" marking may still be used in place of the new limited quantity diamond mark for packages of UN 1950 Aerosols. Limited quantities require the limited quantity diamond mark on cartons after 12/31/20 and may be used now in place of the "Consumer Commodity ORM-D" marking.
